GT

Performance. Range. Dynamics.

The most powerful Audi S model unites the power and beauty of an all-electric Gran Turismo with a long range, high charging capacity, and thrilling driving dynamics.

The Audi S e-tron GT is built to electrify, with dual electric motors producing 680 hp and delivering quattro all-wheel drive traction.

Launch control propels it from 0–100 km/h in just 3.4 seconds, with instant torque available at any speed. Adaptive air suspension and all-wheel steering ensure precision handling, exceptional stability, and a composed, performance-focused drive.

Comfort. Control. Connection.

The Audi S e-tron GT pairs performance focus with modern luxury inside a cabin designed around the driver. Sport contour seats in fine Nappa leather, a flat-bottomed multifunction steering wheel, and a wide centre console create a cockpit-like feel. Premium materials and precision finishes reinforce Audi's commitment to craftsmanship.

The Audi virtual cockpit plus features a 12.3-inch HD display with performance-focused layouts, complemented by the MMI touch response system for navigation, infotainment, and vehicle settings. Ambient lighting with 30 selectable colours sets the tone for every journey.

Practicality meets Gran Turismo comfort with generous space for four adults and split-folding rear seats for versatility. The optional Bang & Olufsen 3D premium sound system transforms every drive into an immersive audio experience. In the S e-tron GT, interior comfort, advanced technology, and driving focus come together seamlessly.

Power. Precision. Presence.

The Audi S e-tron GT makes a statement before it moves.

A sculpted Gran Turismo body is defined by its wide stance, low roofline, and flowing lines that balance aerodynamic efficiency with striking design. The Singleframe grille, finished in light titanium with honeycomb structure, is flanked by HD Matrix LED headlights with Audi laser light for exceptional clarity. Strong shoulders lead to a tapered rear, where a full-width light strip and integrated diffuser emphasise its width.

Every surface is shaped to manage airflow, cooling, and stability, ensuring its performance is as functional as it is beautiful. The result is a design that commands attention and delivers purpose in equal measure.

Technical specifications

MOTOR

Engine type	Electric
Charge time 10% - 80% (DC, HPC)	18 minutes
Charge time 0% - Max (AC, 3ph 16A@230V)	660 minutes

POWER

Power output	500 kW (680 hp)
Electric torque output front / rear	305 / 590 Nm
Battery type	Lithium-ion
Gross battery capacity	105 kWh
Net battery capacity	97 kWh
Electrical power consumption (combined)	19.7 - 18.0 kWh/100 km

POWER TRANSMISSION

Drive type	quattro all-wheel drive
------------	-------------------------

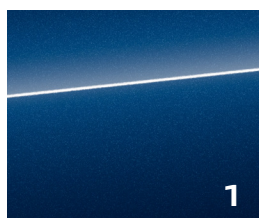

PERFORMANCE AND RANGE

Top speed*	245 km/h
Acceleration 0-100 km/h	3.4 s
