Comfort and
Protection

**The world is changing.
Every day. On a large
and small scale.**

**And we are
changing with
it. The way we
dress, the places
we travel to and,
not least, our
personalities –
our whole lives**

**are marked by change and
progress. How fortunate that
an Audi keeps up with these
changes, reinvents itself with
us, and adapts to our needs –
with Audi Genuine Accessories.
We would like to introduce the
possibilities on offer in this
edition of our catalogue.**

**The stories on the following
pages will show that
your options are as
varied as life itself.
Outdoor activities
in breathtaking
landscapes, a photo
shoot with fascinating animals
almost outshone by carbon-fibre
add-on parts, or the infinitely
colourful world of our smallest
passengers –
reinventing
ourselves takes
many forms.
There is one effect,
however, that will
always remain the
same: We will see
the world in a new
light.**

Highlight_

An Audi can rise to new challenges and adapt to its owner's changing needs:
with Audi Genuine Accessories' retrofit solutions.

07

We
constantly
reinvent
ourselves.

**Everything is changing constantly:
Not just us, but also our lives and needs.**

Everybody is developing. Continuously. Consciously or unconsciously. Radically or marginally. Our personalities are made up of many facets. And we can emphasise each and every one of them – by changing our hairstyle, the way we dress or the way we live our lives. One look at an old photograph of ourselves will show how we change, and how many possibilities we have of continuously reinventing ourselves. Every day.

Your Audi is always there for each and every version of you. You can reconfigure your Audi with new functions and design elements with a variety of retrofit solutions¹ from Audi Genuine Accessories. Technical features, style packages and much more – all options are open to you when adapting your Audi to your new needs. Head-up display, traffic sign recognition, Audi smartphone interface or new design elements such as the exterior mirror housings in carbon fibre: You can ensure your Audi matches your life again and again with the right retrofit solutions from Audi Genuine Accessories.

Why not adapt your own Audi, too?

¹ Please contact your Audi Partner for information on which products are suitable for your model, which restrictions apply, the amount of time required for installation and how much it costs.

Enhance your options.

Activation of navigation function and data

Offers the possibility of activating the navigation function and data in your Audi at any later point in time. This requires the navigation preparation feature available Ex works.

Retrofit option for Audi smartphone interface

A mobile phone¹ and your Audi are connected seamlessly with the Audi smartphone interface. Your smartphone content, including navigation, telephone, music and selected third-party apps are brought seamlessly onto the MMI screen via a USB cable¹.

Retrofit option for reversing camera

The reversing camera is integrated discretely into the boot lid handle. It is activated by engaging reverse gear or pressing the button in the centre console. It helps you manoeuvre by displaying the area behind your vehicle on the MMI screen with helpful dynamic and static elements.

¹ Please ask your mobile phone manufacturer whether your smartphone is compatible.

Just like us, our surroundings are constantly evolving: the traffic, roads, signs and possible connections. You and your Audi can adapt to these new challenges with Audi Genuine Accessories' retrofit solutions. Please ask your Audi Partner for more information.

Head-up display

The multi-coloured and high-contrast head-up display from Audi Genuine Accessories provides the driver with important information in his/her direct field of vision on a transparent OLED display.

²The system operates within certain limitations and can assist the driver. It is always the driver's responsibility to exercise care while driving and pay full attention to the traffic situation.

Change your Audi's look.

**Exterior mirror housings in carbon fibre**

Dynamic and sporty: The exterior mirror housings in carbon provide a visual accent.

Rear lid spoiler in carbon fibre

The high-quality rear lid spoiler enhances the good aerodynamics; the use of carbon as an exclusive material exemplifies sheer force.

**Cast aluminium wheels**

A special eye-catcher for every Audi. Depending on the model and colour of your Audi, these can create a harmonious overall look or give your vehicle a completely new look.

An Audi reflects its owner's personality. It shows their distinctive characteristics and appreciation for design.

With the style packages from Audi Genuine Accessories you can give your Audi a completely new character, both in the interior and on the exterior. You can choose from exterior mirror housings, decorative panels or spoilers made from exclusive materials, and find a range of customisation options in Audi's progressive design and quality.

Sport and Design_

Audi Genuine Accessories create exciting new facets for every Audi, making your vehicle even more individual. For example with high-quality carbon add-on parts.

Small elements. Big impression.

As fascinating as a snake, as strong as a horse: Carbon fibre is a true natural talent that combines many useful characteristics. Discover what this fascinating material has in common with nature – and why it is an excellent material for add-on parts from Audi Genuine Accessories.

Strong

Horses have been around for 56 million years. With their power, strength and grace they remain fascinating. The properties of carbon fibre are perfectly reflected by this enduring animal. Carbon fibre has the resistance and strength of steel but is twice as light.

Light

Carbon fibre is – figuratively speaking – as light as a feather. Similarly, an eagle's feathers are also surprisingly light. The plumage only makes up five to ten percent of the total bodyweight – at a wingspan of up to 3.7 metres. Due to its unique flight capabilities, this majestic creature is even used in aerodynamics research.

Unique

The Southern White Admiral, the Small Tortoiseshell, the Pale Clouded Yellow: Even the names given to butterflies are unique. They can have colourful dots or a monochrome glimmer, as the Great Mormon in our picture does. With more than 180,000 species, butterflies are the second largest order of insects. They owe their beauty to their special surface texture of their wings which diffracts light, causing brilliant and unique light effects. Just like carbon fibre.

Dynamic

With speeds of up to 70 km/h greyhounds are among the fastest animals on the planet. They can reach such speeds thanks to their physique, which is simultaneously light, powerful and aerodynamic – combining the best qualities of a horse and an eagle. It is precisely this combination of lightweight and great resistance that has made carbon fibre the most sought-after material in motorsports. The large number of small fibres ensure an increased performance, better safety and improved longevity. And they look really sporty, too.

Even if carbon fibre has had its place in vehicle construction for a long time: This material offers many previously unknown possibilities for exciting new uses in automotive engineering. At Audi's Lightweight Design Centre in Neckarsulm, numerous experts are working on finding out where we can take carbon fibre technology in the future.

Carbon fibre turns your Audi into even more of an eye-catcher on the roads: with carbon add-on parts from Audi Genuine Accessories. The carbon radiator grille inlays reinforce the focal point of the vehicle's front and make the Audi rings appear even more striking.

We can even coax a little more speed out of the sides of your Audi – visually at least. Carbon fibre exterior mirror housings and door cover strips emphasise your Audi's athletic build at exactly those points in the design lines that already create a sense of movement and sportiness.

Always in peak condition.

Sportiness is also a question of style.
Discover design that combines both form and function – with the sports and design products from Audi Genuine Accessories.

01 Audi rings decal

The Audi rings decals emphasise the brand appearance of your vehicle. Available in various colours for lots of models.

02 Footrests and pedal caps in stainless steel

The combination of brushed stainless steel and anti-slip rubber is a perfect mix of design and safety. The photo shows pedal caps and footrest for automatic vehicles.

03 Design gecko

The high-quality design gecko in aluminium look is an attractive eye-catcher for the interior or any other metal surface. The gecko symbolises quattro four-wheel drive. The design figure can be placed virtually anywhere, e.g. on one of the air outlet grilles; with its integrated magnet, it can also be attached to suitable metallic surfaces.

04 Entry LEDs

LED projection of the Audi rings on the ground when the doors are opened. Available in sets of 2 for the front or rear doors. Please contact your Audi Partner for further details and product availability.

Wheels and Tyres_

Developed especially for each Audi model:
Audi Genuine wheels and tyres in exclusive designs.

A different kind of catwalk: the road

It is not only fashion designers who pin pictures of their latest creations to the wall to prepare their designs for the runway. Audi designers also make very high demands when developing the latest wheels and tyres. They use their expertise and eye for detail to select the best designs – perfectly tailored to the individual models. Only once all premium criteria are met is the final collection ready for its big debut.

Designed for aesthetic appreciation. Built for the road.

Discover the impressive collection of current Audi cast wheels.

Lamina 20"

Cast aluminium winter wheel¹ in 10-spoke lamina design, brilliant silver, 9 J x 20 for the Audi e-tron

Carabus 17"

Cast aluminium winter wheel¹ in 5-arm carabus design, reverse, black-gloss finish, 7.5 J x 17 for the Audi A1 Sportback

Astrum 20"

Cast aluminium winter wheel¹ in 5-V-spoke astrum design, brilliant silver, 8.5 J x 20 for the Audi A6 allroad quattro

Secare 17"

Cast aluminium winter wheel¹ in 5-arm secare design, black-gloss finish, 6.5 J x 17 for the Audi Q3

Carabus 17"

Cast aluminium winter wheel¹ in 5-arm carabus design, reverse, brilliant silver, 7.5 J x 17 for the Audi A1 Sportback

Lamina 21"

Cast aluminium wheel¹ in 10-spoke lamina design, matt black, high-gloss turned finish, 9.5 J x 21 for the Audi e-tron

Volsella 22"

Cast aluminium wheel¹ in 5-arm volsella design, matt black, high-gloss turned finish, 10 J x 22 for the Audi Q8

Secare 19"

Cast aluminium wheel¹ in 5-arm secare design, matt black with contrast colour quartz grey, 7 J x 19 for the Audi Q3

Lamina 20"

Cast aluminium winter wheel¹ in 10-spoke lamina design, black-gloss finish, 9 J x 20 for the Audi e-tron

Cast aluminium winter wheel¹ in 5-arm secare design, brilliant silver, 6.5 J x 17 for the Audi Q3

¹ Technical properties of tyres can be found on page 72.

Delivering well-rounded performance.

Because in the end everything revolves around the details:
the additional products for wheels and tyres from Audi Genuine Accessories.

01 Snow chains

For a better grip on snow and ice.
Available in various sizes.

02 Wheel cleaning set

The wheel cleaner set helps to loosen and dissolve dirt, thus facilitating the cleaning process. Suitable for steel and painted alloy wheels. The set contains: cleaning solution, wax polish, microfibre polishing cloth and wheel brush.

03 Valve caps

Set of 4 Stamped with Audi logo. Protect against dust, dirt and moisture. Suitable for all commonly used Audi Genuine valves.

04 Wheel bags

The wheel bags are made from tear-resistant plastic and feature carrier handles to enable simple and clean storage of complete wheels. Wheel bolts can be stored in the outer pockets. Available in various sizes.

02

Transportation_

Cleverly stored luggage or additional storage space make every trip more relaxed. Transport solutions from Audi Genuine Accessories will make your Audi a genuine all-rounder.

3 1

A man wearing a blue helmet and a green t-shirt is snowboarding down a large sand dune. He is in a crouched position, leaning forward, with his arms outstretched for balance. The sand dune is a light beige color, and the sky above is blue with scattered white clouds. The overall scene is surreal, as snowboarding is typically associated with snow, not sand.

Carried away.

No matter what sport you enjoy in your leisure time.
An extraordinary location and the right equipment make all the difference.

Bicycle rack

The frame holder and bicycle rail in a unique design hold your bike in the right position automatically. Maximum carrying load: 20 kg. Quick and easy to handle due to a torque limiting rotary knob. Can only be used in combination with roof carrier unit (available separately).

**Sheer willpower:
the greatest challenges for racing cyclists.**

Riding a racing bike is the ideal endurance workout for everybody whose comfort zone starts beyond the limits. There are lots of steep hills, but not every one is suitable for slender racing bikes. What we need is the right combination of challenging gradients, a route of suitable distance, a beautiful landscape and of course the right equipment. Here are a few examples:

S 34° 2' 58.437"
O 18° 21' 45.422"

Chapman's Peak Drive is an absolute must for everybody who is enthusiastic about South Africa's inspiring scenery. The route is known for its breathtaking views of the ocean, challenging climbs and 114 bends.

N 46° 31' 43.51"
O 10° 27' 13.572"

The **Passo dello Stelvio** in Italy, the second highest mountain pass of the Alps, is an ambitious route with average gradients of 7.4 percent and a total of 48 hairpin bends.

N 58° 32' 13.56"
O 15° 2' 11.399"

The weekend before Midsummer each year, **Lake Vättern**, Sweden's second largest lake, is the place to be for anybody who would like to take part in the extensive Vätternrundan cycling race.

**Uphill to downhill:
the perfect routes for
e-mountain bikes.**

A mountain bike gives you an intense experience of the landscape like virtually no other sports equipment can. Cycling cross-country, you can ride on virtually any unpaved ground – especially downhill. However, thanks to the new additional e-power cycling, uphill is a highlight now, too. To help you get your bike to the start of an extraordinary route, use the Audi Genuine Accessories' convenient bicycle carrier for the trailer towing hitch. The following routes are perfect for breathtaking mountain bike tours:

N 38° 29' 17.632"
W 109° 13' 56.812"

The **Whole Enchilada Trail** in Utah offers 50 km of pure downhill action. It is one of the world's most challenging and scenically diverse mountain bike routes.

S 44° 55' 37.795"
O 168° 44' 10.581"

At the **Rude Rock Trail** at Coronet Peak on New Zealand's South Island, you can pick up speed very quickly if you have the right technique. The amazing panorama will make your heart and your bike jump for joy.

S 33° 59' 16.859"
O 18° 57' 19.053"

Jonkershoek Nature Reserve in South Africa invites you to explore its long valley with high and low plains. The scenic route takes you through the world-famous wine-growing region of Stellenbosch.

Bicycle carrier for trailer towing hitch

Bicycle carrier for up to 2 bicycles. Extension kit for 3rd bicycle available for an additional charge. Also suitable for e-bikes. Maximum carrying load: 60 kg. Free access to luggage compartment thanks to convenient folding mechanism.

S 14° 5' 18.829"
W 75° 45' 47.857"

S 33° 35' 54.24"
O 18° 26' 53.16"

N 42° 50' 51.098"
O 140° 38' 52.5"

Any slope can be a ski-slope: the pros of sandboarding.

No crowds of people, no waiting for snow and no getting up early in the morning to catch the perfect wave – of all the boardsports, sandboarding clearly offers many advantages. All year long. So why not quickly load your board onto your roof using the ski and snowboard rack from Audi Genuine Accessories and follow your passion any time. The world is full of ideal places just for this:

At the edge of the Atacama Desert in Peru you can find the **Huacachina Lagoon**, an enchanting spring surrounded by palm trees. Here, even beginners can throw themselves into the sand and try to board down the dunes.

The **Atlantis** Dunes are a small, almost deserted oasis outside of Cape Town – perfect for a quick escape from it all with action-filled adventures. And the best thing is that the desert is a mere 30 minutes' drive north of Cape Town, which means you can indulge in your boarding passion spontaneously any time.

If you would rather see white mountains, why not travel to **Niseko** in Japan, one of the regions with the most snow in the world. Several ski resorts come together here to offer a wonderful view of the inactive volcano Yōtei-zan.

Ski and snowboard rack

For transporting all sorts of skis and snowboards. Extra-soft rubber pads provide secure support for your equipment. Can only be used in combination with roof carrier unit (available separately).

In flow with nature: switch off with kayaking.

Simply drift along. Forget your everyday life for a moment. In shallow or rapid waters – it's up to you. Whichever type of kayaking you prefer: Not just the starting point and the route must be right, but also your equipment. And it needs to be transported safely. We will show you how and where to do this:

N 68° 42' 29.269"
W 51° 38' 54.07"

Greenland's **Disko Bay** turns the bitter cold into a unique experience. Here you can canoe between icebergs, seals and ice cliffs that are several metres high. If you're lucky, you may even see a whale emerge from the deep blue ocean.

S 33° 47' 46.313"
O 19° 24' 42.799"

The **Brandvlei Dam**, which can be used all year round, is a reservoir near the South African town of Worcester. It is surrounded by a group of mountains, which creates a steady breeze. This ensures that the sun shines very frequently here, even when the neighbouring regions are cloudy.

N 29° 59' 49.093"
W 113° 30' 30.035"

The Mexican peninsula **Baja California** promises lots of sunshine and an overwhelming plant and animal life. It is not uncommon to see flying fish, turtles, whales, dolphins and pelicans.

Kayak rack with tilt function

For single-person kayaks up to 45 kg. Tiltable for convenient loading and unloading. Kayak rack and retaining straps can be locked separately. Can only be used in combination with roof carrier unit (available separately).

Ski and luggage box

Featuring Audi design with improved aerodynamics courtesy of the flat, sporty look. Can be locked and can be opened from both sides for convenient loading and unloading. Simple quick attachment system with torque limit. Available in 3 sizes: 300 ltr., 360 ltr. and 405 ltr. Can only be used in combination with roof carrier unit (available separately).

The world all to yourself: the best perspective for paragliders.

Conquer the skies – in a leisurely manner and without the buzzing of jets and propellers. Paragliding is the most graceful way of exploring the world from an extraordinary perspective. For this exclusive leisure activity you need lots of equipment and preparation. To help you stow all your equipment the Ski and luggage box is the perfect solution. Here are some inspiring places where you can experience the joy of paragliding:

S 33° 55' 2.006"
O 18° 24' 14.047"

Cape Town is one of the most impressive places for paragliders. Standing at the top of **Signal Hill** and while you are gliding down, you will have a breathtaking view of Table Mountain and the regions around Cape Town such as Sea Point and Clifton.

N 37° 51' 34.207"
O 20° 37' 29.41"

Navagio Beach in Greece, with its Mediterranean climate and turquoise blue ocean, is a paradise for base jumpers. The cliff is 200 metres high, and there is a huge shipwreck half buried in the sand of the cove.

N 5° 58' 12.233"
W 62° 32' 10.23"

With a height of 979 metres, **Angel Falls** in Venezuela is the highest waterfall in the world. Surrounded by largely untouched nature, you can leap off directly from the top of the waterfall or jump out of an aeroplane.

All aboard.

Our leisure time is just as multi-faceted as our everyday life. With the transport solutions from Audi Genuine Accessories you can rest assured that your equipment will arrive safely at your destination.

01 Carrier unit

For various roof modules. Printed with Audi logo. Anodised aluminium profile. Anti-theft screw attachment.

02 Trailer towing hitch

Available for retrofit for many vehicles with or without the corresponding preparation.

03 Roof carrier bag

Specially designed for storage and transport of the roof carrier unit (available separately). High-quality fabric in anthracite with robust zip fastener. Carrying grip and practical hanging loops facilitate transport and storage.

04 Kayak rack with tilt function

For single-person kayaks up to 45 kg. Tiltable. Kayak rack and retaining straps can be locked separately. Can only be used in combination with roof carrier unit (available separately).

03

Good to know.

Useful knowledge and interesting facts.

Some geckos have so-called setae, tiny hairs, on the undersides of their feet. These enable them to even scurry up glass windows. Our cuddly gecko Rob, however, would rather be chauffeured.

In Osaka, Japan, there is a motorway that passes through a skyscraper at the height of the 5th to 7th floors of the building. You will continue to find this and other unusual routes with our navigation update.

If there are two odours at the same time, our noses do not perceive a blend of the two smells, but both alternately. Depending on which half of our noses has the upper hand at that moment. Fortunately our pleasant, fresh scents, available in visually appealing dispensers in the singleframe design, will convince both halves of your nose.

In Alaska it is prohibited to tie animals to the roof of a vehicle. Fortunately you won't have to do that with our rear seat protective cover.

On average it takes only 25 seconds to tie your shoelaces, put your coat on or make a snowball. With a little practice you can put on our premium snow chains almost as quickly.

There are people who do not leave fingerprints due to a genetic disorder. For everybody else, there is the cleaning cloth for touch displays.

In Chinese, the word "Qi" stands for vital energy and is understood to be a substance that can reach throughout the entire universe. In the Audi universe, our practical adapter solutions provide new energy.

In Lapland, reindeer antlers are sprayed with reflective colours so that we can see them better in the dark.

That does not mean that everything else will glow in the dark, too. For this reason, Audi's main beam assist¹ will improve your vision at night.

¹Please always note that assist systems can only help the driver within the system limitations. It is always the driver's responsibility to exercise care and pay full attention while driving.

Communication_

Keeping in touch on the go:

Communication solutions from Audi Genuine Accessories support the driver and passengers on all journeys.

4 3

2 am. Warsaw.

If you're looking for real subculture, you can discover it in the dynamic and trendy neighbourhoods of Warsaw's Praga and Śródmieście Południowe districts. Life is vibrant here.

Away from the throngs of tourists. Unadorned and urban. Find these hidden hotspots and know that your Audi is safely parked. The Universal Traffic Recorder from Audi Genuine Accessories provides you with extra peace of mind in the event of your vehicle being damaged.

02

Simply thrilling.

A city's hotspots are not immediately apparent. You have to put out your feelers to find them. In Warsaw this means taking the plunge and exploring the city away from the hustle and bustle. Your reward? A night at the hippest Thai restaurant or enjoying the City's best Virgin Mule.

The Polish capital is one of the trendiest metropolises in Europe; however, you can still find the original Warsaw vibe in the blossoming districts of the city. Old factories, post-war architecture, bon vivants and flickering neon signs: All of this is what makes this city so special in the first place.

When planning a roadtrip to a major city, one of the first concerns is safe parking and then being able to explore further on foot. This sometimes proves inflexible and challenging. The Universal Traffic Recorder provides an excellent solution to ensure you can get the most from your city tour. Simply park your car, activate the Universal Traffic Recorder and off you go, safe in the knowledge that the recorder is keeping an eye on your Audi.

Universal Traffic Recorder

The Universal Traffic Recorder from Audi Genuine Accessories is a 2-channel camera system for video recording in the vehicle. With this system you can document situations via a front and a rear camera while driving and while the vehicle is parked. You can use the corresponding app to configure your individual settings.

Please note that the system is subject to country-specific adaptations and that not all functionalities are available in all markets.

03

01

01 Too Thai

Simple but good. The Too Thai is a high-quality Thai restaurant, bar and party hotspot all rolled into one. Night turns to day in a unique atmosphere.

02 Club culture

Warsaw is on the move. Every day there is a new nightclub opening somewhere. So keep your eyes open for any new hidden hotspots or look for insider tips online.

03 Warszawa Wschodnia

At the Soho Factory, celebrity chef Mateusz Gessler spoils his guests in two ways: Fine dining on the left, and a 24/7 bistro with an open show kitchen and impressive industrial architecture on the right.

Smart driving.

Stay well connected without being tied down:
with the communication solutions from Audi Genuine Accessories.

01 Navigation update

Adds new map content. Please contact your Audi Partner for details of which products are suitable for your model and which restrictions apply.

03 Retrofit option for Audi smartphone interface

Connects your smartphone to your vehicle. Brings smartphone content, such as navigation, telephone, music and selected third-party apps seamlessly onto the MMI display via USB cable.

02 USB adapter cable

For use with Audi smartphone interface and Audi music interface. You can also use the USB adapter cable to charge your device easily and conveniently while driving.

04 Wireless charging pad

Enables cable-free charging of any Qi-capable smart device outside the vehicle. Sleek and compact design. Including USB cable.

02

Family_

The smallest passengers can be the most demanding.
You can make their journey comfortable and
relaxing with child seats and other products
from Audi Genuine Accessories.

Safety for little adventurers

Children discover the world in their own extraordinary way.
Just like renowned photographer Jan von Holleben:
He even puts child seats at the centre of adventures.

With his photographs **Jan von Holleben** has been inspiring us to have more fun for over 15 years. His playful pictures of children and their imaginary worlds have made him famous. In his photographs he does not only direct the children, but turns them into playmates.

Jan firmly believes that humans learn by playing. Together with the children, he puts himself into fantasy worlds – making Audi's Genuine child seats a part of these visual stories, and playfully turning them into fascinating objects for children.

Babies and toddlers still have a limited perception of their surroundings. Clear, simple shapes and colours define their worlds. Their basic needs are feeling protected and safe.

With the Dualfix I-SIZE child seat with newborn insert from Audi Genuine Accessories we can give our small passengers the comfort and safety that they need. The integrated side impact cushion technology (SICT inside) is always ready for operation without the need for activation. Babies can enjoy this protection for a long time: For infants up to 15 months of age, the child seat must be fitted so it faces the rear; once they reach a height of 60 cm the seat can be used without the newborn insert.

At two to three years of age, children have learnt to walk and talk. Their range of movement increases all the time, introducing a new and unexpected dynamic to their lives. They have a playful appreciation of the world with a lot of room for interpretation.

Children with a height of between 61 and 105 cm are seated safely in the Dualfix I-SIZE child seat from Audi Genuine Accessories without newborn insert. If the child is over 76 cm or older than 15 months, the child seat can be installed so it faces the front. The seat turns into a merry-go-round: Without having to remove and install the seat, it can be rotated around 360° from a forward-facing to a rearward-facing position, or conveniently pivoted the opened door when taking the child in or out of the seat. And if the ride was too wild, the cover can be removed and washed.

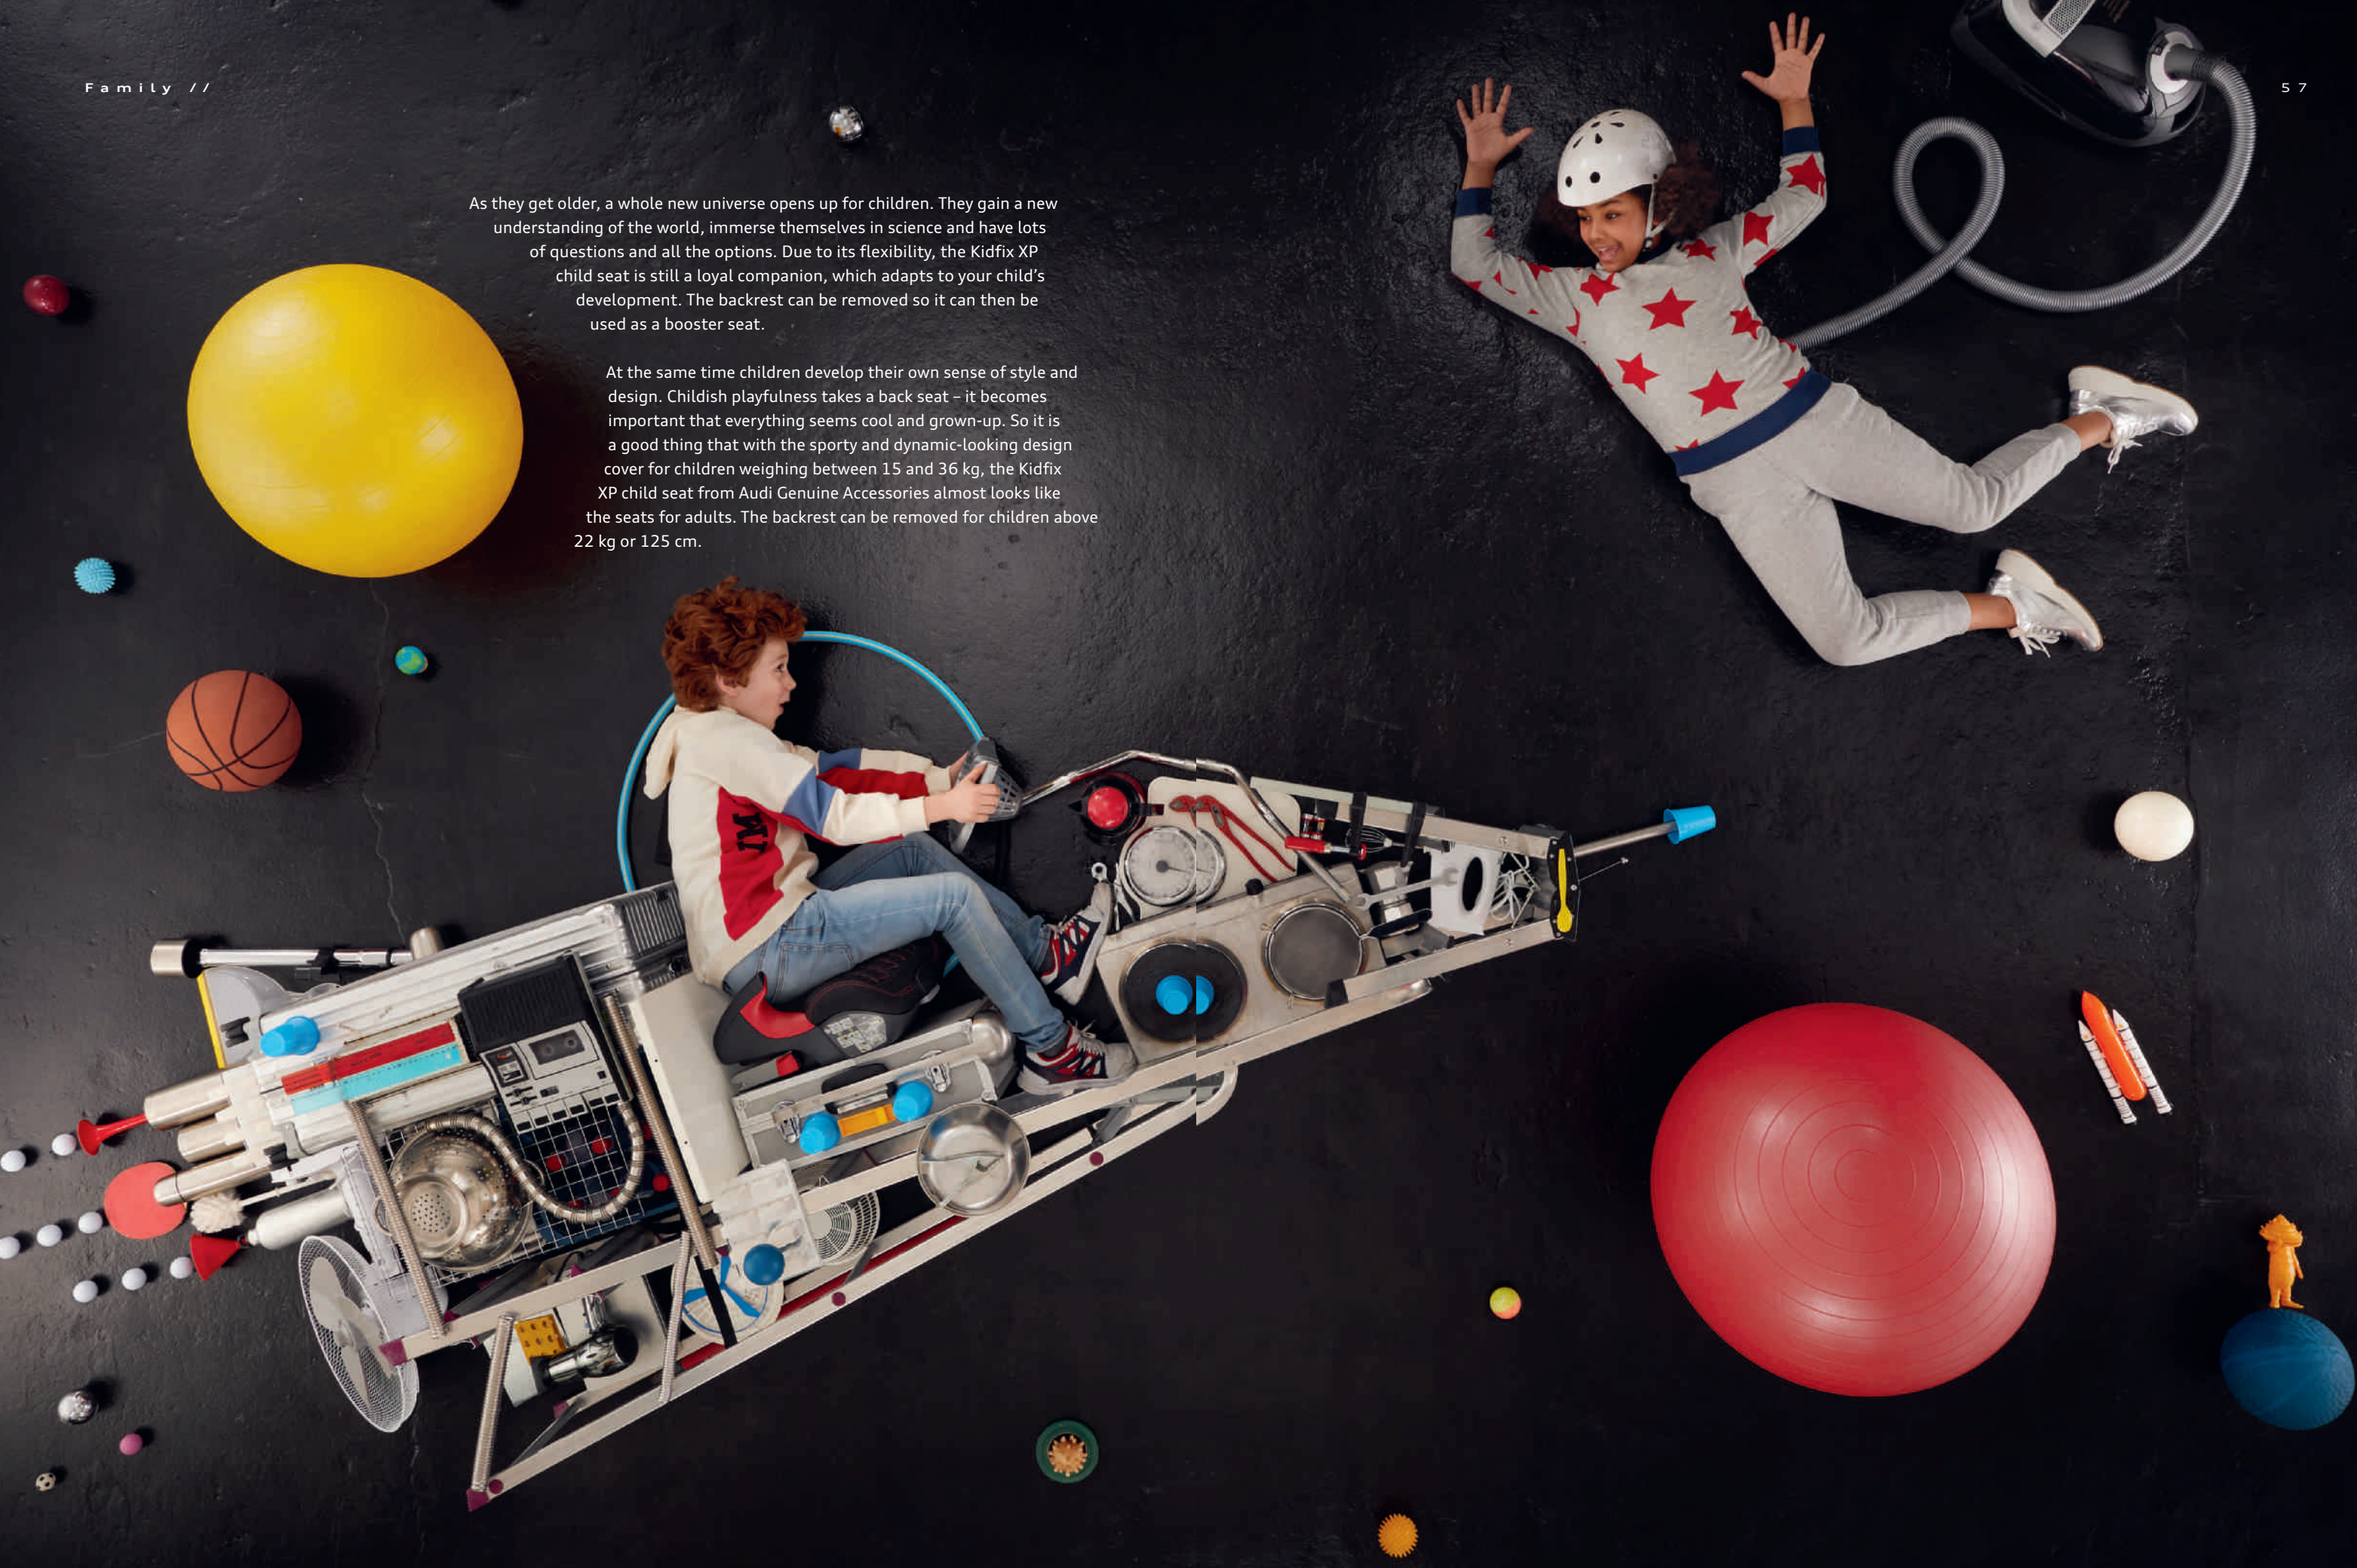

Primary school children are ready for any adventure – the more exciting the better. They look at the world with curiosity and get involved into any game that they can find. There are no limits to their imaginations.

The Kidfix XP child seat from Audi Genuine Accessories is designed for all sorts of adventures. The seat continually adapts to children between 3.5 and 12 years of age and is ideal for any type of fantastic journey.

Child seats are not tested for dragons – they are, however, examined in dynamic tests in crash-test facilities, approval tests, endurance tests and climatic change tests so that we can ensure the quality that you expect from Audi.

As they get older, a whole new universe opens up for children. They gain a new understanding of the world, immerse themselves in science and have lots of questions and all the options. Due to its flexibility, the Kidfix XP child seat is still a loyal companion, which adapts to your child's development. The backrest can be removed so it can then be used as a booster seat.

At the same time children develop their own sense of style and design. Childish playfulness takes a back seat – it becomes important that everything seems cool and grown-up. So it is a good thing that with the sporty and dynamic-looking design cover for children weighing between 15 and 36 kg, the Kidfix XP child seat from Audi Genuine Accessories almost looks like the seats for adults. The backrest can be removed for children above 22 kg or 125 cm.

Adventures? Absolutely!

Any adventure can be enjoyed all the more with the knowledge that you and your loved ones are safe. Turn any adventure into a carefree experience for young and old – with the products from Audi Genuine Accessories.

01 Dualfix I-SIZE child seat

Suitable for newborns and children up to a height of 105 cm. Great comfort for the first four years of life. The 360° rotation option makes it easier to place the child in the seat and take it out again, and the seat can be used flexibly as a rearward- or forward-facing child seat. Can only be secured with ISOFIX child seat anchoring system.

03 Rob the gecko cuddly toy and plush steering wheel

Rob the gecko made from high-quality plush. Durable and easy to wash.

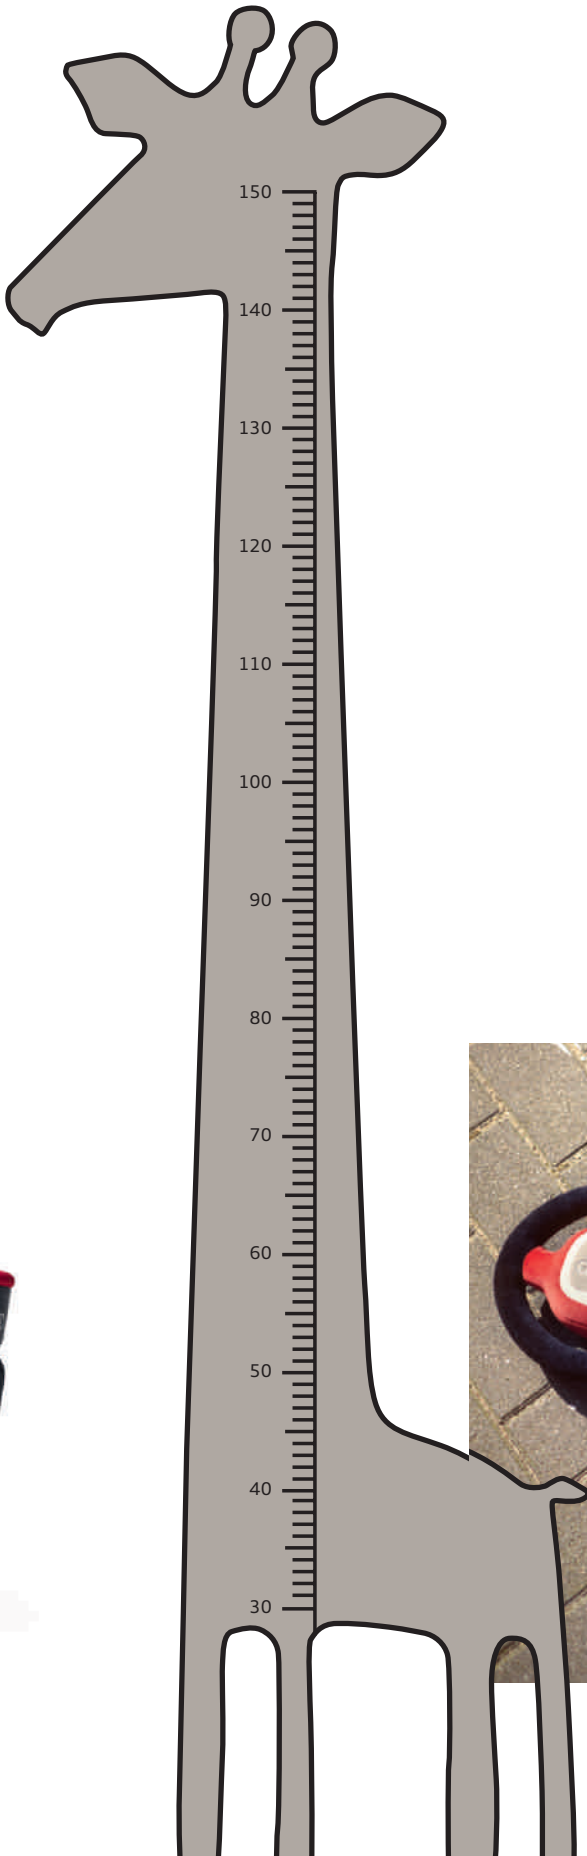

Plush steering wheel in exclusive Audi design. 24 x 24 cm. With squeak horn.

02 Kidfix XP child seat

Suitable for children weighing between 15 and 36 kg or between the ages of approx. 3.5 and 12 years. Intelligent seat belt routing. Easily adjustable head restraint and backrest for customised comfort. For children weighing 22 kg or more or with a height of 125 cm or more, the Audi Kidfix XP child seat can be used as a bolster seat.

01

02

03

Comfort and Protection_

Your Audi covers a long distance in its lifetime. With Audi Genuine Accessories car care products, your journey will be more pleasant, and your Audi will be well taken care of.

No cause for concern.

An Audi is able to withstand all kinds of things. So there's no need to worry about stains or a little snow or dirt. Especially when you know that there is a range of specially developed simple cleaning solutions.

Children can be wild and curious – no need for you to worry.

Parents are impressed and proud to see their children using the infotainment system in their Audi. They just don't want their children's fingerprints or, in this case even messier marks, on the innovative touch display. With the right cleaning products from Audi Genuine Accessories you will find a solution quickly.

The 2-in-1 display cleaner for screens and high-gloss surfaces will clear things up again. Together with the cleaning cloth for touch displays, fingerprints and marks don't stand a chance.

Especially the passengers in the back can take their toll on an Audi. You can counter this with the right pre- and after-care.

Man's best friend could be your Audi interior's worst enemy. Fresh from a walk or swim in the lake, rest assured that the intensive cleaning products from Audi Genuine Accessories keep your vehicle in perfect shape.

The high-quality components of the leather care set gently clean leather surfaces, renew their protective film and protect them from wear and fading. You can also use it to revive worn leather and restore its softness.

Wintertime is full of spectacles of nature. Some of them, however, can arrive rather unexpectedly.

Hardly anything is as stunning as tiny snowflakes creating a winter landscape. And it is good to know that you can usually get your Audi ready to go by scraping and wiping a little snow away. What you don't usually expect is large amounts of snow falling overnight or sliding off rooftops. However, we have a perfect solution for that, the expertly designed winter products from Audi Genuine Accessories let you easily overcome the challenges of wintertime.

The multi-functional ice scraper made from robust polycarbonate has an extendable telescopic rod, which effectively helps you clear ice and snow from areas that are difficult to reach. Another useful feature is the separate cleaning device integrated in the scraper, which ensures clean wipers free of ice and therefore a streak-free view through the windscreen.

Spotless again.

Discover the manifold cleaning and protection solutions from Audi Genuine Accessories. Individual and tailor-made products for your Audi are available from your Audi Partner.

Gloss care

Make sure to use the gloss care products from Audi Genuine Accessories so that every ray of sunshine that hits your Audi's paintwork reflects beautifully. Get clear results with the glass polish, active foam cleaner, polymer wax polish, wax shampoo or polishing cloth from Audi Genuine Accessories.

Weather protection

Frost can creep into any openings. And spring, summer and autumn also bring their own challenges. With our antifreeze screenwash (1000 ml or 500 ml), our de-icer and the other weather-protection solutions from Audi Genuine Accessories, your Audi will hardly notice harsh weather.

Care product sets

You lead an exciting and many-faceted life – but looking at your Audi, you wouldn't suspect it. The care products bags for summer and winter are also many-faceted, as well as practical. A set with the most important cleaning and care products to prepare your Audi for all kinds of environmental influences and weather conditions.

The taste of freedom.

The perfect espresso with real crema – without waiting in line.

With Audi Genuine Accessories' Espresso mobile you have your own personal coffee shop on board at all times. The set contains: an elegant storage bag with two break-proof cups, a microfibre cloth, a waste container for coffee capsules and a cleaning brush.

The scent of happiness.

Human beings can distinguish between and remember over a trillion different smells.

None of our senses affect our feelings as directly as our sense of smell. Smells can evoke intense memories within us, even after decades. For this purpose, our brain stores an olfactory sensation which allows us to experience memories that we thought we had forgotten as soon as we smell a particular scent. Whether we like a scent or not depends on the situation in which we first perceived it. What is interesting here is that our brains store smells experienced in pleasant situations as nice smells more quickly than ones associated with unpleasant experiences.

When we are happy and associate this with a scent, it is imprinted in our memory. Little by little, this effect is reversed and the scent itself triggers a feeling of happiness.

Like the scents in the Audi fragrance dispensers in elegant singleframe design. The scent of the black fragrance dispenser, for example, calls to mind an Oriental market with a hint of exotic flowers, sandalwood and musk. The yellow fragrance dispenser, meanwhile, conjures an invigorating, refreshing feeling with lemon and ginger. We are transported to a wild, rugged coastal landscape by the red Mediterranean fragrance dispenser which elicits a sense of pure relaxation with the scent of sea salt.

For your memory and for your car:
The three individually adjustable fragrance dispensers diffuse sensations and awaken positive emotions.

Through thick and thin together.

Whether you are planning a short excursion or a long road trip, be prepared for anything. Discover the solutions for your comfort and protection from Audi Genuine Accessories.

01 Luggage compartment shell

Protects the luggage compartment floor against dirt. With surrounding edge and anti-slip surface.

03 Rear seat protective cover and safety harness for dogs

The cover protects the rear seats, side panels and rear doors of your Audi against dirt. It is equipped with lockable slots for seat belts, allowing the use of the safety harness for dogs.

The safety harness allows your dog to be transported safely and comfortably. Available in four sizes.

05 Espresso mobile

Enjoy real espresso with crema. The set contains: espresso mobile unit, elegant storage bag with two break-proof cups, microfibre cloth and waste container for coffee capsules. Connects to cigarette lighter. Pressure: 19 bar.

02 Loading sill protective mat

Protects the bumper, for example when transporting dogs. It is secured to fastening rings of luggage compartment. Includes carrying strap.

04 All-weather floor mats

Durable. Easy to clean. Protect against moisture and heavy soiling. Made entirely from recyclable plastic.

Classification of tyre parameters

The table shows the class ratings for fuel efficiency, wet grip and external rolling noise for different tyre sizes.

	Model	Design	Dimension	Tyre size	Fuel efficiency class	Wet grip rating	External rolling noise class	Snow chain suitability
Summer wheels	A1 Sportback	5-V-spoke pilleus	7.5 J x 18	215/40 R 18	C	A	72 	
	Q8	5-arm volsella	10 J x 22	285/40 R 22	C	A	75 	
	e-tron	10-spoke lamina, matt black, high-gloss turned finish	9.5 J x 21	265/45 R 21	C	A	69 	
	Q3	5-arm secare, matt black, with contrast colour quartz grey	7 J x 19	235/50 R 19	C	B	71 	
Winter wheels	A1 Sportback	5-arm carabus, brilliant silver	7.5 J x 17	215/45 R 17	E	B	71 	
	A1 Sportback	5-arm carabus, black-gloss finish	7.5 J x 17	215/45 R 17	E	B	71 	
	Q3	5-arm secare, brilliant silver	6.5 J x 17	215/65 R 17	C	B	72 	x
	Q3	5-arm secare, matt black, with contrast colour quartz grey	7 J x 19	235/50 R 19	C	C–B	70–72 	
	Q3	5-arm secare, black-gloss finish	6.5 J x 17	215/65 R 17	C	B	72 	x
	e-tron	10-spoke lamina, brilliant silver	9 J x 20	255/50 R 20	C	B	73 	
	e-tron	10-spoke lamina, black-gloss finish	9 J x 20	255/50 R 20	C	B	73 	
	A6 allroad quattro	5-V-spoke astrum, brilliant silver	8.5 J x 20	245/45 R 20	C	C–B	72 	
	A6 allroad quattro	5-V-spoke astrum, black-gloss finish	8.5 J x 20	245/45 R 20	C	C–B	72 	

Please ask your Audi Partner which tyres are available in your country.

Legal notices on Audi Genuine Accessories

Audi Genuine Accessories are offered by AUDI AG as an option for an additional charge. The colour, appearance and material may differ from those in the illustrations. Information about the delivery specification, appearance, performance, dimensions, weights, fuel consumption and operating costs of the illustrated vehicles and products correspond to the information available at the time of printing. Errors and omissions excepted. May only be reproduced in whole or in part with the express written

consent of AUDI AG. Please contact your Audi Partner for information on which products are available and suitable for your model, which restrictions apply, the amount of time required for installation and how much it costs. Subject to change without notice.

Relevant vehicle parameters such as weight, rolling resistance and aerodynamics may vary depending on additional equipment and accessories (attachments, tyre sizes,

etc.) and can, together with weather and traffic conditions and individual driving style, affect fuel consumption, electric power consumption, CO₂ emissions and performance values. The components from Audi Genuine Accessories are not used to determine the vehicle’s consumption and emission figures. It is therefore only possible to install them after the vehicle’s first registration.
