# Seamless connection, convenience and control

In today's fast paced digital world, being connected means being enabled, in control and in touch with the things that matter to you.

Audi connect is an innovative connected car technology that provides you with a range of features to help keep you and your Audi connected, wherever you are. By harnessing the power of a mobile connection and marrying it to your Audi's onboard intelligence, Audi connect will make your driving experience more fun, more convenient and more interactive.

# Advanced Safety and Security Features

Enjoy more confidence in your own safety and the safety of the things that matter, with Vehicle Status Reports and Remote Access that allows you to manage your car from wherever you are.

## Audi Incident Assist

In the event of a minor accident, a pop-up menu will appear on your vehicle's multimedia interface (MMI), giving you a simple way to make an emergency or roadside assistance call.

## Emergency Call

In the event of a significant accident your car automatically connects to the Audi Emergency Call Centre, and can transmit the GPS position, driving direction, and number of passengers in your car to relevant local authorities.

## Online Roadside Assistance

In the event of a breakdown, Audi roadside assistance effortlessly connects you with a professional breakdown service, sending accurate vehicle and location data to the breakdown call centre.

## Audi Service Request

Audi Service Request automatically shares information directly from your car to your preferred Audi Service Centre, and can even book appointments for you.

## Vehicle Status Report

Monitor important information about your car, from distance travelled to window and door checks, fuel level, pending warnings and maintenance checks.

## Car Finder

Car Finder turns your smartphone into a remote control so you can find your car by activating the horn or flashing the headlights or receive walking directions to your vehicle.

## Privacy Mode

Disable all outgoing data transmission except for information required for security services like Emergency Calling. (Privacy settings are displayed in the myAudi app).

## Valet Alert

This feature allows you to set a perimeter and maximum speed for your vehicle, giving you effective control of valet parking services.

## Geofencing

Geofencing Alert lets you set up to 10 prohibited locations for your Audi, with parameters you can adjust according to time of day or date.

## Speed Alert

Speed Alert gives you the ability to monitor how fast your Audi is going in real-time and immediately alerts you if a speed limit has been breached.

## Theft Alarm Notification

Receive immediate smartphone alerts if your car is being broken into or tampered with.

## Remote Access

You can manage your Audi remotely with the myAudi app, operating the doors, lights and the air conditioner in your car.

# Enhanced Navigation and Infotainment Features

Discover the best route to your destination or explore your favourite music, social media, or news and weather services without interrupting your drive.

## Online News

Get the latest news updates displayed on the MMI with detailed text and imagery from a variety of world-class news sources.

## Weather

Access current weather updates, 7-day forecasts and a weather map, including weather forecasts for your destination, and temperature and wind conditions for predefined locations.

## POI Search with Voice Control

Use your voice to search for and access key information about nearby places of interest (POI) like operating hours, visitor reviews and photos.

## Navigation with Google Earth

Satellite mapping provides up-to-date street information from your regular map view, with high-resolution aerial and satellite images available in all zoom-levels of the map.

## Destination Entry via myAudi

Plan your journey from your smartphone and store the navigation details on the myAudi app. As soon as you leave, the data you saved will pop up on your MMI navigation display.

## Parking Information

Parking Information helps you find available parking spaces at your destination or the nearest car park and check prices of parking fees.

## Predictive Route Guidance

View live traffic updates and alternative routes to plan your route based on current traffic flow and predicted deviations.

## Map Update Online

Stay ahead of the traffic with monthly map updates including construction blockades and deviations, specific to your country or province.

## Detailed Point of Interest Display

Use the online search engine to stream travel information about your destination, find tourist spots and save locations directly onto your preferred route for future trips.

# myAudi App

The myAudi app provides an effortless link between you and your Audi. From wherever you are, you can access real-time information about your vehicle, request service bookings, and even plan your next journey, then share your route directly to your vehicle. The app also offers remote services such as locking or unlocking your vehicle, as well as finding your vehicle.

You can download the myAudi app here:
